

Foreman - Bug #4508

Cannot match parameter override based on the computer_resource of a host

02/28/2014 04:47 PM - Leah Fisher

Status: New	
Priority: Normal

Pull request:	
Description	
When trying to match an override parameter based on compute resource, it doesn't seem to match. This seems to be an issue where the compute_resource returns the whole object, not just the name.

- Category set to Parameters

I've not had chance to try this, but I suspect matching against the name and the type in brackets will work (same as you see in the new host "deploy on" list), since that's the string representation of a compute resource. For example:

```
compute_resource=My VMware cluster (VMware)
```
