Revision 8f9b6994 - 10/06/2014 10:20 AM - Ivan Necas

Refs #4611 - rake-ify foreman-config and db_pending_migration/seed in settings

This way, we can determine in the installer if the rake db:migrate/seed should be run in the installer.

Later, we also could use this information to inform the entering user that the application is not in ready state yet: preparation for maintenance page.

Revision dcde6712 - 11/19/2014 09:01 AM - Ivan Necas

Fixes #4611,#7353 - control the db_pending_migration/db_pending_seed from installer

This allows tracking the state of migration/seeding in the database and making sure the rake tasks are done on subsequential installer attempts when something goes wrong the first time.

Also, as part of the `foreman-config` calls, we ensure that the settings are initialised before the httpd starts (preventing the race-conditions happening when the httpd and rake db:seed start at the same time)

Closes GH-225
