Foreman - Bug #4637

remove search by label from all ancestry objects

03/12/2014 07:36 AM - Ohad Levy

Pull request:			

Description

Currently, all ancestry objects (hostgroups, orgs, locations) allow to search by label for background compatibility, however, that compatibility is required only for hostgroups, and not taxonomies.

this again conflicts with katello, which actually uses the label column in the db, and does not allow them to search based on it.
