<b>Description</b>	
<p>As I understand if, the syntax for arrays should be JSON/YAML stype, so if I wish to have an array of hashes the value for a parameter should be something like <code>"[{ "hostname": "host", "password": "secret" }]</code>.</p> <p>Adding this works fine, but when the change is saved, foreman changes the syntax, so the next time I edit the host the value is instead <code>"[{"hostname"=&gt;"host", "password"=&gt;"secret"}]</code>.</p> <p>Trying to edit anything on this host then gives me the error "<code>(&lt;unknown&gt;): did not find expected ',' or '}' while parsing a flow mapping at line 1 column 2</code>" since foreman doesn't get the syntax it itself created, which means that this value has to be manually changed every time anything is changed on the host in question.</p>

Apologies, I missed this from 1.4.2. Retargeting for 1.4.3 if we do it, else 1.5.0.
