

Installer - Bug #4640

Second installer run overwrite hand-crafted configuration

03/12/2014 10:19 AM - Lukas Zapletal

Description	
Report from (Katello) bug: https://bugzilla.redhat.com/show_bug.cgi?id=907408	
I already configured katello (with an answer file) a week ago. But I mistakenly ran katello-configure again (without an answer file).	
This might be issue for non-puppet users who do not expect this behavior.	
Therefore we might discuss the possibility of a warning and interactive question when using the installer for second+ time.
