

## Katello - Bug #4646

### Host Groups: No longer able to access and assign activation keys to a group

03/13/2014 11:51 AM - Brad Buckingham

<b>Description</b>	
Several changes made in both Foreman and Katello have broken the ability to assign Katello activation keys to Foreman host groups.	
e.g. Changes to Foreman's <code>_form.html.erb</code> caused the defacing that includes the activation keys form to silently fail. Removal of the Katello V1 API routes and old tupane UI caused the form to no longer be functional once defacing was corrected.	

#### Associated revisions

##### Revision 7cbce94d - 03/13/2014 11:55 AM - Brad Buckingham

Fixes #4646: hostgroup-akeys: fix regressions with activation keys on hostgroups page

This commit fixes a few small regressions with the activation keys on the host groups page.

1. update so that activation keys pane will be correctly included within the host group page
2. update the activation keys controller to support requests by environment
3. update the activation keys pane to use the v2 api (since v1 was removed)
4. update cross-linking to take the user to the nutupane activation keys

Note: additional changes will be needed for the products associated with activation keys to be listed correctly.

##### Revision 2c8896eb - 03/13/2014 12:21 PM - Brad Buckingham

Merge pull request #3807 from bbuckingham/fix-hostgroup-akey

Fixes #4646: hostgroup-akeys: fix regressions with activation keys on hostgroups page
