

Katello - Bug #4649

Repo Publishing: listing file is not always getting created

03/13/2014 01:32 PM - Brad Buckingham

Target version:	Katello 2.0	
Difficulty:	medium	Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:	1093724	Red Hat JIRA:
Pull request:		

Description

It appears that the 'listing' file is not getting created during the publish process for all repos. This may be an issue in the 'clone' distributor; however, it needs to be investigated.

The following is a scenario followed by the resulting tree layout for `/var/lib/pulp/publish/https/repos/ACME_Corporation`:

1. create a repo that points to a RHEL6.5 kickstart repo (Note: same issue observed for non-kickstart repos)
2. sync the repo (creates: `ACME_Corporation-rhel6_5-kickstart`)
3. create a content view, add the above repo and publish a version (creates: `ACME_Corporation-view2-1-rhel6_5-kickstart` & `ACME_Corporation-Library-view2-rhel6_5-kickstart`)
4. promote the content view to dev (creates: `ACME_Corporation-rhel6_5-kickstart`)

tree output: (observe 'listing' missing from: `ACME_Corporation-view2-1-rhel6_5-kickstart`, `ACME_Corporation-Library-view2-rhel6_5-kickstart` & `ACME_Corporation-rhel6_5-kickstart`)
