Description	
<pre>1. /etc/cron.weekly/katello-remove-orphans rake aborted! No Rakefile found (looking for: rakefile, Rakefile, rakefile.rb, Rakefile.rb)</pre>	
(See full trace by running task with --trace)	
the issue is that the script refers to the old /usr/share/katello directory	
Need this to point to the new dir for katello/foreman
