

## Katello - Bug #4726

### Creating a Host Group causes error fetching Activation Keys

03/19/2014 06:43 PM - Mike McCune

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Brad Buckingham	
<b>Category:</b> Hosts	
<b>Target version:</b> Katello 2.0	
<b>Difficulty:</b> medium	<b>Fixed in Releases:</b>
<b>Triaged:</b> Yes	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b> 1) Login 2) Select an Org from the drop list 3) Configure -> Host Groups  Note error:  "Unable to fetch Activation Keys from Katello"  This seems to go away after you create your 1st Host Group.	

#### Associated revisions

##### Revision 97105fff - 03/20/2014 01:00 AM - Brad Buckingham

fixes #4726 - update hostgroup activation keys to support katello v2 apis

When a user selects a lifecycle environment & content view, a request is sent to the server to retrieve the activation keys associated with the selected env+view. This allows the user to choose from those via the Activation Keys pane.

This commit is to fix the behavior which previously performed multiple requests to the server to retrieve environment, content view and then keys. This alters that behavior to perform a single request for the keys.

##### Revision 9ad721b9 - 03/20/2014 12:39 PM - Brad Buckingham

Merge pull request #3849 from bbuckingham/issue-4726

fixes #4726 - update hostgroup activation keys to support katello v2 apis

#### History

##### #1 - 03/19/2014 06:46 PM - Erik Jacobs

Clarification:

- 1) login
- 2) select org
- 3) configure - host groups
- 4) new host group
- 5) select environment (library)
- 6) select view (there's only one -- see 4725)

"Unable to fetch Activation Keys from Katello" appears.

Also, from foreman/production.log:

```
Processing by HostgroupsController#environment_selected as */*
