

Katello - Bug #4750

Can't use the url helpers in katello to get links for v2 api

03/20/2014 04:11 PM - David Davis

Status: Resolved	
Priority: Low	
Assignee: David Davis

Pull request:	
Description	
Here's an example:	
<pre>[32] foreman » Katello::Engine.routes.url_helpers.api_activation_keys_path(:api_version => "v2") => "/katello/api/activation_keys" [33] foreman » Katello::Engine.routes.url_helpers.api_activation_keys_path(:api_version => "v1") => "/katello/api/v1/activation_keys"</pre>	
Note that without v2, the link goes to the v1 api. I think this is because we're using the same namespace (api) both in v1 and v2 files. In foreman, this is working correctly. I think this is just because maybe it has a different load order or something:	
<pre>[43] foreman » Rails.application.routes.url_helpers.api_hostgroups_path(:apiv => "v2") => "/api/v2/hostgroups" [44] foreman » Rails.application.routes.url_helpers.api_hostgroups_path(:apiv => "v1") => "/api/hostgroups"</pre>
