Revision a89d70ad - 03/21/2014 08:33 PM - Eric Helms

Fixes #4758: Adds client authentication to enabled repos call.

After moving the client authentication solely to the Candlepin proxies controller, the enabled repos call from katello agent could no longer complete successfully. This slightly re-factor the client cert to be generic to any client providing an SSL cert and includes this authentication method for the enabled repos call in the V1 systems controller.

Revision 9d5fe9e7 - 03/21/2014 09:08 PM - Eric Helms

Merge pull request #3859 from ehelms/fixes-4758

Fixes #4758: Adds client authentication to enabled repos call.
