

Katello - Bug #4764

Can not extract strings for Katello

03/21/2014 12:38 PM - Bryan Kearney

Status: Resolved	
Priority: High	
Assignee: Eric Helms	
Category: Web UI	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/3865	
Description	
<p>If I disable the katello plugin, I can extract the strings for Foreman. However, if I following the old commands for extracting strings for katello [1] I get a katello.pot file but it contains foreman strings. I need some way to extract and update the katello strings.</p> <p>please update the README in the katello locale meeting and the page below.</p> <p>[1] https://fedorahosted.org/katello/wiki/118N</p>	

History

#1 - 03/21/2014 12:50 PM - Dominic Cleal

I'd suggest looking at the Foreman-provided method for extracting strings from plugins, see discovery and bootdisk for examples.
