

Katello - Bug #4773

Content View: erratum filter rule validator fails when adding multiple errata id rules

03/21/2014 03:57 PM - Brad Buckingham

Status: Closed	
Priority: Normal	
Assignee: Brad Buckingham	
Category: Content Views	
Target version: Katello 2.0

Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Due to a faulty scope on the content view erratum filter rule, the validator will only allow 1 errata id to be added to the filter.	
The issue appears to be with the checking of the 'types' attribute which is a serialized array.

Revision e085574c - 03/24/2014 12:11 PM - Brad Buckingham

fixes #4773 - Content Views: fix issue which did not allow for multiple errata ids per filter

The erratum filter rule 'types' is a serialized array. The scope that was placed on the model was incorrectly looking for 'nil'; however, with a serialized type, we really need to fetch the records to look at the value of 'types', as the value for an existing rule will not be 'nil', even when types is not specified.
