Katello - Bug #4785

angular-gettext's gettext function only works for extraction, need to also handle replacements

Description

See https://github.com/rubenv/angular-gettext/issues/29

We have various gettext() calls in our Bastion javascript files that will only return the untranslated string. We need to figure out a way to handle replacement.

A couple of ideas:

1. Wrap the angular-gettext function with our own version that does replacements
2. Use what's outlined here: https://github.com/rubenv/angular-gettext/issues/29#issuecomment-37196935
