Pull request:	
Description when default order is enabled on an AR object, scoped search would generate something like: <pre>SELECT DISTINCT 'columnX' ... ORDER by 'columnY'</pre> which is not allowed on postgresql. this has been fixed at https://github.com/wvanbergen/scoped_search/commit/1b4a9eb31d920331357305cd41da7a75f1fa3f8e which requires to upgrade to scoped_search 2.7.1
