

Katello - Bug #4795

Passing incorrect organization 'id' to product create should return 404

03/24/2014 12:45 PM - Adam Saleh

Status: Closed	
Priority: Normal	
Assignee: Justin Sherrill	
Category: API	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Description of problem: Creating product by api doesn't work	
Version-Release number of selected component (if applicable): {"name":"katello","version":"1.5.0-14.201403231838gitb03147e.el6"}	
How reproducible: Foreman with kattello installed required.	
Steps to Reproduce: curl -X POST -k -u admin:changeme -H "Content-Type: application/json" 'https://qetello01.usersys.redhat.com/katello/api/v2/products/' -d '{"organization_id": 1, "description": "test-prod-desc", "name": "test-product1"}'	
Actual results: {"displayMessage":"PGError: ERROR: operator does not exist: character varying = integer\nLINE 1: ...\"taxonomies\".\"deletion_task_id\" IS NULL AND (name = 1 or lab... \n ^\nHINT: No operator matches the given name and argument type(s). You might need to add explicit type casts.\n: SELECT \"taxonomies\".* FROM \"taxonomies\" WHERE \"taxonomies\".\"type\" IN ('Organization') AND \"taxonomies\".\"deletion_task_id\" IS NULL AND (name = 1 or label = 1) ORDER BY title LIMIT 1\",\"errors\":[\"PGError: ERROR: operator does not exist: character varying = integer\nLINE 1: ...\"taxonomies\".\"deletion_task_id\" IS NULL AND (name = 1 or lab... \n ^\nHINT: No operator matches the given name and argument type(s). You might need to add explicit type casts.\n: SELECT \"taxonomies\".* FROM \"taxonomies\" WHERE \"taxonomies\".\"type\" IN ('Organization') AND \"taxonomies\".\"deletion_task_id\" IS NULL AND (name = 1 or label = 1) ORDER BY title LIMIT 1\"]}	
Expected results: 200 response accomanied with product hash	
Additional info: Same error when creating provider.

@Dcleal is this the "you need to use locations" issue?

No, that's an error on the organisation edit page. I've no idea what this is.

#4 - 03/28/2014 12:39 AM - Justin Sherrill

It looks like this is simply due to you passing the org id for Organization id instead of the org label (which sounds really silly).

I get the same error when specifying organization_id: 1, but if i use:

```
'{"organization_id": "ACME_Corporation", "description": "test-prod-desc", "name": "test-product1"}'
```

It seems to work fine. However, i would expect the org lookup to return a 404 versus this strange error.
