Pull request:									
Description									
<p>Range drop-down menu in Monitor -> Trends -> <my_architecture_trend> is not aligned. I believe it should be inside "Trend of the last days." text.</p> <p>I have this trend like this:</p> <table><thead><tr><th>Fact Name</th><th>Display Name</th></tr></thead><tbody><tr><td>architecture</td><td>Somename</td></tr><tr><th>Value</th><th>Display Name</th></tr><tr><td>x86_64</td><td>x86_64</td></tr></tbody></table> <p>When I click at the trend, I see "[range_dropdown_menu] Trend of the last days." instead of "Trend of the last [range_dropdown_menu] days." Also when selected something, drop-down menu is rendered without selected number to me (see attached screenshot).</p> <pre># rpm -qa grep -e katello -e foreman foreman-1.5.0.10-1.el6sat.noarch rubygem-hammer_cli_katello-0.0.3-6.el6sat.noarch foreman-ovirt-1.5.0.10-1.el6sat.noarch foreman-selinux-1.5.0-0.develop.el6sat.noarch katello-apache-1.0-1.noarch ruby193-rubygem-foreman-tasks-0.4.0-5.el6sat.noarch rubygem-katello_api-0.0.8-2.el6sat.noarch katello-1.5.0-18.el6sat.noarch foreman-proxy-1.5.3-1.el6sat.noarch katello-ca-1.0-1.noarch katello-certs-tools-1.5.5-1.el6sat.noarch rubygem-hammer_cli_foreman-0.0.18-8.el6sat.noarch katello-installer-0.0.30-1.el6sat.noarch foreman-libvirt-1.5.0.10-1.el6sat.noarch smqa-x3550m3-01.lab.eng.brq.redhat.com-foreman-client-1.0-1.noarch rubygem-hammer_cli_foreman_tasks-0.0.1-4.el6sat.noarch pulp-katello-plugins-0.2-1.el6sat.noarch foreman-vmware-1.5.0.10-1.el6sat.noarch foreman-postgresql-1.5.0.10-1.el6sat.noarch smqa-x3550m3-01.lab.eng.brq.redhat.com-foreman-proxy-1.0-1.noarch foreman-compute-1.5.0.10-1.el6sat.noarch rubygem-foreman_api-0.1.11-4.el6sat.noarch ruby193-rubygem-katello-1.5.0-23.el6sat.noarch</pre> <p>Mine browser is firefox-27.0.1-1.fc20.x86_64.</p>		Fact Name	Display Name	architecture	Somename	Value	Display Name	x86_64	x86_64
