

Katello - Bug #4839

Sometimes the hidden user is not created in pulp

03/25/2014 03:27 PM - Justin Sherrill

Status: Resolved	
Priority: Urgent	
Assignee: Justin Sherrill	
Category:	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
For some reason during the install the hidden user is not created in pulp:	
<pre>[root@sat-perf-04 ~]# mongo MongoDB shell version: 2.2.4 connecting to: test use pulp_database switched to db pulp_database db.users.find() { "_id" : ObjectId("5330b3791fdebb21a7000004"), "name" : "admin", "roles" : ["super-users"], "_ns" : "users", "login" : "admin", "password" : "ddHgAbkpmVE=,Dmt/xYH+I36b2sK/DVWXdAH350aQWN3uXunHdY+Zifs=", "id" : "5330b3791fdebb21a7000004" }</pre>	
The result is that system registration fails during package profile upload:	
<pre>1. subscription-manager register --username=admin --password=changeme --org=ACME_Corporation --force --env=dev/RHEL6 The system with UUID 87be7404-e39d-4365-994e-aad65fd7d770 has been unregistered The system has been registered with id: 22b3455f-a235-4a8d-92e7-19820f4eadb0 Error updating system data on the server, see /var/log/rhsm/rhsm.log for more details.</pre>
