Revision b8f8ebdd - 03/25/2014 08:46 PM - Eric Helms

Fixes #4853: Prevents 500 error loading subscription details from API.

Previous changes to ensure the use of Foreman's authentication and authorization
call resulted in the subscriptions details breaking. The find_subscriptions
method makes a call out to Candlepin which requires a current user. Thus,
the authorize method was moved higher in the filter stack and the entities
required to do authorization such as the provider, and organization were
placed prior to the authorization check.

Revision 7f6eb115 - 03/26/2014 06:21 PM - Eric Helms

Merge pull request #3886 from ehelms/fixes-4853

Fixes #4853: Prevents 500 error loading subscription details from API.
