

Katello - Bug #4860

composite content view component add seems cumulative

03/26/2014 12:41 AM - Justin Sherrill

Status: Closed	
Priority: Normal	
Assignee: Walden Raines	
Category: Web UI	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:

Pull request:	
Description	
<p>On the "Content Views" > "Add" page of a composite content view, click 'add content views' multiple times seems to keep a running list of all IDs sent and keeps sending those. For example:</p> <ol style="list-style-type: none">1. Create a Repo FOO2. Create 2 content views (A & B), add FOO to both, and publish version 1 of both3. Create a new composite content view4. On the content view > Add page of this composite, select both view A & B, and click "Add Content Views"5. A request is sent to the server with components [4,5] (These are just examples of 2 ids)6. You will get an error saying there is a repo conflict. So far so good.7. Un-select View A (So that only View B is listed) from the list and click "Add Content Views" again8. An error will occur and the list of components will be [4,5,4]. <p>Everytime you click the "Add Content Views" Button, the selection is added to the list of everything previously selected (include duplicates) and sent again.</p> <p>The error the 2nd time is "An error occurred updating the Content View: has already been taken" which doesn't really make sense, but the browser should only be sending what is actually selected.</p>
