Pull request:			

Description

Ensure that the appropriate API routes are proxied through to candlepin to support:
- content overrides (Subscription Manager)
- guest id support (as well as appending additional data when guests are reported -- such as Hypervisor Type).

These routes include:

Content Overrides
- GET /api/content_overrides
- GET /api/consumers/:id/content_overrides
- PUT /api/consumers/:id/content_overrides
- DELETE /api/consumers/:id/content_overrides

Guest ID Support
- GET /api/guestids (fake root route)
- GET /api/consumers/:id/guestids
- GET /api/consumers/:id/guestids/:guest_id
- PUT /api/consumers/:id/guestids
- PUT /api/consumers/:id/guestids/:guest_id
- DELETE /api/consumers/:id/guestids/:guest_id

Associated revisions

Revision 29f27a11 - 05/08/2014 01:09 PM - Michael Stead

Fixes #4878: Proxy requests to guestid and content_overrides to candlepin

- Add support for proxing PUT requests to candlepin

- Allow proxying DELETE request with body to candlepin

- Proxy calls to /api/consumer/:id/guestids/* directly to candlepin   * Add fake root path for guestids allowing client tooling to check support   * Proxy GET /consumers/:id/guestids to candlepin   * Proxy GET /consumers/:id/guestids/:guest_id to candlepin   * Proxy PUT /consumers/:id/guestids to candlepin   * Proxy PUT /consumers/:id/guestids/:guest_id to candlepin   * Proxy DELETE /consumers/:id/guestids/:guest_id to candlepin

- Proxy requests to candlepin's content_overrides   * Added fake root path that is checked by rhsm (unlocks adding extra guest data support in python-rhsm)   * GET /api/consumers/:id/content_overrides   * PUT /api/consumers/:id/content_overrides   * DELETE /api/consumers/:id/content_overrides
