

Foreman - Bug #4952

location required in new host UI

03/29/2014 12:49 PM - Thomas McKay

Status: Rejected	
Priority: Normal

Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1102354	Red Hat JIRA:
Pull request:	
Description	
The "new host" UI does not have a blank location choice. Because of this, every resource needed must also be associated with a resource or it is not available for choosing in the form.	

History

Two points:

If you don't want to manage locations then locations support should be turned off.

Second how did you get to that state? Once you don't have a location then it will ask you to create one. The only time this might happen is when you are in an org context that has no locations? And not in a location context?

IMHO the solution is to create a location

#2 - 03/30/2014 01:35 PM - Thomas McKay

- Status changed from Feedback to New

This is foretello: Orgs & locations are enabled. On first login I created a location, cleverly named "location."

The source of the issue, I believe, is that the "new host" UI location dropdown does not have a blank entry. This means every new host *must* belong to a location, which then means all resources that are referenced by this host must also be in a location.

This behavior is, I believe, incorrect and a new host need not be required to belong to a location. Correct?

I set priority as "high" since it impacts new user experience greatly when first host created cannot find any of the resources set up previously during the tutorial.

Once the location attribute is enabled, new managed host should have a location (otherwise why turn on the feature?).

maybe all we need is something like <https://github.com/theforeman/foreman/pull/1336?>

#4 - 03/31/2014 07:21 AM - Dominic Cleal

- Category changed from Web Interface to Organizations and Locations

- Status changed from New to Feedback

#5 - 04/14/2014 10:34 PM - Thomas McKay

- Status changed from Feedback to New

Several locations were created. The problem is that there is not a way to select a "blank" location. This makes the location for a new host, when

locations are enabled, as required.

- *Status changed from New to Rejected*

if locations are enabled, a user is expected to select one, this is by design, hence closing.. thank you!
