<b>Description</b>	
Some things I noticed in the sync plan API:	
<ul style="list-style-type: none"><li>• Some of the doc is wrong like it references products (e.g. param :id, :number, :desc =&gt; "product numeric identifier", :required =&gt; true; param :organization_id, :identifier, :desc =&gt; "Filter products by organization name or label", :required =&gt; true)</li><li>• Show requires organization_id. AFAIK, we're only requiring organization_id on show if the ID is not unique across orgs</li></ul>

Also, delete and update require organization\_id too. Probably should fix those as well.
