

Katello - Bug #4967

Katello Kickstart Default uses https for installing the bootstrap rpm

03/31/2014 01:08 PM - Ivan Necas

Status:	Closed	Fixed in Releases: Found in Releases: Red Hat JIRA:
Priority:	Normal	
Assignee:		
Category:		
Target version:	Katello 2.0	
Difficulty:		
Triaged:	Yes	
Bugzilla link:		
Pull request:		
Description But it fails on certs verification, as the ca cert is not there yet: either install the the provisioned system and use http as output of 'subscription_manager_configuration_url'		

Associated revisions

Revision a8814534 - 04/04/2014 10:47 AM - Ivan Necas

Fixes #4967 - use http instead of https for bootstrap rpm in kickstart

We don't have the certificate installed yet, so the verification fails.

Revision ef7e02e5 - 04/04/2014 01:38 PM - Ivan Necas

Merge pull request #3944 from iNecas/fix-bootstrap-url

Fixes #4967 - use http instead of https for bootstrap rpm in kickstart

The workaround is to specify the http url explicitly in the subscription_manager_registration snippet (this also contains a workaround for <http://projects.theforeman.org/issues/4974>) :

```
<% if @host.params['kt_org'] and @host.params['kt_activation_keys'] %>
# add subscription manager
yum -t -y -e 0 install subscription-manager
rpm -ivh http://your-host.example.com/pub/katello-ca-consumer-latest.noarch.rpm

echo "Registering the System"
subscription-manager register --org=<%= @host.params['kt_org']%> --name=<%= @host.name %> --activationkey=<%=
@host.params['kt_activation_keys'] %>
<% end %>

<% if @host.puppetmaster && !@host.puppetmaster.empty? %>
subscription-manager config --rhsm.baseurl=https://<%= @host.puppetmaster %>/pulp/repos
<% end %>
```
