<b>Description</b> 1. Create a custom product 2. Go to create a new repo 3. Using your keyboard: a) Type a name b) hit tab c) hit tab again d) use your arrow key to arrow down twice to select puppet e) hit tab again to navigate to the url box f) hit enter  You will see that the type selector will switch to yum right as the form is submitted. Sure enough a yum repo is created

##### Revision 3594acba - 06/20/2014 01:36 PM - Eric Helms

Fixes #4999: Allow repository creation using only the keyboard to traverse the form.

This adds an explicit blank option to account for the initial blank being present from an empty model attribute on a new resource. The absence of the blank leads to the position of selection being off when manipulating the select via the arrow keys.
