| Description it seems that textareas (like in templates and ptables) auto save <code>\r\n</code> chars as eol chars. this can effect our templates as they lead to unexpected behaviour - i.e. wget foreman/unattended/built^M as the url will return 404. | |
| Related issues: Is duplicate of Foreman - Bug #525: config templates contain incorrect EOL ch... Closed 12/13/2010 | |
