Katello - Bug #5011

Content View (version) deletion fails if host(group)s are assigned to relevant install media

04/01/2014 06:23 PM - Justin Sherrill

Status:	Closed		
Priority:	Normal		
Assignee:	Stephen Benjamin		
Category:	Orchestration		
Target version:	Katello 2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:	1513932	**Red Hat JIRA:**	
Pull request:			

Description

In katello 1.4 if you tried to delete a content view from an environment and there was a kickstart tree in that content view version, it would blow up when trying to remove the install media from foreman if at least one host or host group was assigned.

We need to revalidate this to ensure that it is fixed.

Install media isn't relevant anymore since Katello uses content sources now. Although, I did test and the CV version gets deleted fine even when a host is assigned via content sources.
