Pull request:			

Description
When creating a host & host group Katello/foreman currently does not allow selecting a puppet environment that was not created as part of a content view & environment. We should allow that in case a user doesn't want to use content views for that

- Related to Bug #6329: toggle label content view/puppet environment, toggle show/hide installation media on new host form added

#8 - 06/25/2014 12:59 PM - Stephen Benjamin

- Status changed from New to Closed

It works.

It's kind of weird that it's named "content view" in the UI -- but #6329 will fix the naming issue.
