

Katello - Bug #5017

Support repo set commands using Product and repo name

04/01/2014 11:56 PM - Justin Sherrill

Status: Closed	
Priority: Normal

Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>The previous katello cli made it pretty easy to enable repos by product and repo name. Now you have to specify ID which is not nearly as scriptable.</p> <p>I want something like:</p> <pre>fr hammer repository-set list --product="Red Hat Enterprise Linux" --organization-id=ACME_Corporation hammer repository-set enable --product="Red Hat Enterprise Linux" --organization-id=ACME_Corporation --repo-set='Red Hat Enterprise Linux 6 Server (RPMs)'</pre> <p>right now you would have to script some grepping and awking to script it. It is very unfriendly</p> <p>also repository-set list right now returns a csv list which seems odd...</p>	

History

#1 - 06/04/2014 02:03 AM - Eric Helms

- Category set to Hammer
- Triaged changed from No to Yes

#2 - 06/04/2014 02:09 AM - Justin Sherrill

- Status changed from New to Closed

This is now resolved.

#3 - 08/21/2014 02:44 PM - Eric Helms

- translation missing: en.field_release set to 13
