

## Katello - Bug #5030

### content views: UI: unable to consistently add/remove items for a package group and errata by id filter

04/02/2014 02:25 PM - Brad Buckingham

<b>Description</b>	
<p>This issue is similar to <a href="http://projects.theforeman.org/issues/5027">http://projects.theforeman.org/issues/5027</a>; however, it is a separate bug.</p> <p>A user is not able to consistently add/remove contents (errata ids or package groups) to/from a filter.</p> <p>Scenario (using errata):</p> <ol style="list-style-type: none"><li>1. Pre-req - have a content view with an errata by id filter that has a few errata added to it.</li><li>2. go to the filter (e.g. Content -&gt; Filters -&gt; select errata filter)</li><li>3. from List/Remove, select one or errata to remove &amp; click 'Remove Errata'</li><li>4. the errata are successfully removed</li><li>5. from Add, select the same errata (removed in 3) &amp; click 'Add Errata'</li><li>6. the errata are successfully added</li><li>7. from List/Remove, select the same errata (added in 5) &amp; click 'Remove Errata'</li><li>8. errata are not removed and a 404 is received from the server</li></ol> <p>It appears that 8 may be trying to remove the errata using the same IDs it used when removing them in 3; however, the reality is that they are 2 different filter rules.</p>

#### Associated revisions

##### Revision 0d36f07f - 06/24/2014 10:58 AM - Eric Helms

Fixes #6176, #5030, #4969, BZ1103492: Improving interaction of content view errata id filters.

The previous content view errata id filter would continuously load all errata in chunks in order to allow client side filtering. And, while this worked for small errata sets, larger errata sets such as RHEL 6.5 (2500ish errata) were unwieldy and led to confusion. This change does the following:

- moves all type and date filtering server side
- enabled UI select all behavior to allow adding errata that is not currently visible client side\
- adds a new option to create errata id content view filter rules with a bulk set of errata or based on a search/param query
