Katello - Bug #5037

Cannot enable ISO repo sets from a manifest

04/02/2014 06:44 PM - Justin Sherrill

Status:	Resolved		
Priority:	Normal		
Assignee:	Stephen Herr		
Category:			
Target version:	Katello 2.0		
Difficulty:	easy	**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

1. Import a manifest
2. Go to "red hat repositories" page
3. Click on the ISOs tab
4. Select one of the ISO checkboxes such as 'Red Hat Enterprise Linux 6 Server (ISOs)'

it spins and spins but then just unchecks itelf.

Traceback:

undefined method `type_id' for nil:NilClass (NoMethodError)
