Pull request:			

Description

When FreeIPA is managing DNS records, and you attempt to delete a host that hasn't been built yet, the call will fail and the host won't be deleted in FreeIPA.

The DNS record isn't created until the host is provisioned.

- Subject changed from FreeIPA Realm entry isn't deleted when host hasn't been built to Minor bug fixes for Realm FreeIPA Smart Proxy

- **FreeIPA Realm entry isn't deleted when host hasn't been built**
  When FreeIPA is managing DNS records, and you attempt to delete a host that hasn't been built yet, the call will fail and the host won't be deleted in FreeIPA.

- **Return 404 when host not found during delete instead of 400**

- **Don't rescue when host disable fails**
  In order to request a new OTP, we must disable the host when it's already been enrolled. Remove the rescue.
