Katello - Bug #5080

Puppet module name listing is not org safe

04/04/2014 07:19 PM - Justin Sherrill

Status:	Closed		
Priority:	Normal		
Assignee:	Justin Sherrill		
Category:			
Target version:	Katello 2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

1. In org A create a repo and upload a puppet module
2. In org A create another repo and upload a differently named puppet module
3. In org B, create a repo and upload a differently named puppet module

4. In org A create a content view and attempt to add a puppet module by name, note the list of of available puppet module names
5. In org b create a content view and attempt to add a puppet module by name, note the list of of available puppet module names

On step 4, the listed puppet modules should only display the names from steps 1 & 2
On step 5, the listed puppet modules should only display the name from step 3

One of these will not be the case.

Revision aafb8c89 - 04/05/2014 12:26 AM - Justin Sherrill

fixes #5080 - invalid puppet module names would show to add to CV

due to the way facet filters work, you need to specify :and between all the filters
unlike in a normal search where you can specify multiple filter lines
and tire will :and them together

Revision 53902fbe - 04/14/2014 04:34 PM - Justin Sherrill

Merge pull request #3949 from jlsherrill/puppet_orgs

fixes #5080 - invalid puppet module names would show to add to CV
