

Katello - Bug #5081

Product deletion does not handle repositories correctly

04/04/2014 07:28 PM - Justin Sherrill

Status: Closed	
Priority: High	
Assignee:	
Category: Orchestration	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1086933	Red Hat JIRA:
Pull request:	
Description Currently repo deletion is dynflowed, but product deletion is not. As a result deleting a product causes the repos in katello to be deleted but not in pulp or the content removed in elastic search.	
Related issues:	
Related to Katello - Refactor #6185: Dynflowize product delete	Closed 06/12/2014
Blocks Katello - Feature #6180: Implement org destroy	Closed 06/12/2014

Associated revisions

Revision 184ff842 - 06/20/2014 12:14 AM - Partha Aji

Fixes #5081, #6185 - Dynflowing product delete

Deleting product was previously doing a repository.destroy_all . This commit aims to address that and other product deletion issues by dynflowing the entire product delete orchestration.

Also includes changes by ivan for
Fixes #5081 - use Dynflow polling feature for candlepin async actions

Merge pull request #4218 from parthaa/product-destroy

Fixes #5081,6185 - Dynflowing product delete

History

#1 - 04/11/2014 08:59 PM - Bryan Kearney

from se training:

Lab11: if a product is deleted without first deleting the repository, the repository name cannot be reused. I suspect that the repository name is not getting deleted from the database.
