Foreman - Bug #5086

Virtual machines in ovirt are created with "Thin provision" disks

04/07/2014 12:02 PM - Xavier Naveira

Description

When creating machines in Foreman connected to a Ovirt instance the machines are created with "Thin Provision" disk. To be able to create "Pre allocated" disks should be made available in the Compute Profile section for example.

- Status changed from New to Duplicate

Thanks for the report. I'm closing this in favour of #5197, as it has more votes and info on it, despite being newer.
