

## Foreman - Bug #5118

### Api pie cache is huge (> 200k) - we should gzip it

04/08/2014 08:20 PM - Lukas Zapletal

<b>Pull request:</b>	
<b>Description</b>	
<p>Simple gzip brings it down to 18k, that's a save. Since <b>every</b> CLI must download this file each session (or at least once), we should consider this. Zlib is part of Ruby. The client should really go for <code>api pie.json.gz</code> file and this should be the only way of downloading this.</p> <p>Putting this as packaging, this is task both in Foreman Core and in CLI.</p>
