

Foreman - Bug #5132

Unable to provision new ovirt compute resource system,

04/09/2014 09:02 PM - Darrell Budic

<b>Pull request:</b>		
<b>Description</b>  Using the 1.5 nightlies (fresh install, last tested 4/9/14) for the ovirt support, I'm unable to properly provision hosts. After creating the host in Foreman, once I hit Submit, it does the setup, and then hangs at the barber pole of "running - Power up". It creates the new VM on ovirt, but does NOT power it on:  create In Progress completed - Set up compute instance znc.int completed - Query instance details for znc.int completed - Create DHCP Settings for znc.int completed - TFTP Settings for znc.int completed - Fetch TFTP boot files for znc.int running - Power up compute instance znc.int (===== 80% complete barber pole here   )  Manually powering on the VM causes it to boot and begin a kickstart, but when it gets to the point where it tries to pull the kickstart file from foreman, it fails because foreman can't find the host by token, hostname, or ip address.  After the initial attempt times out, it fails the provisioning, and if you save it again, you get a host screen for a host still in build mode. It also deletes the VM. However, it can now produce the kickstart file by any method, and if you recreate the VM by hand (with same mac for dhcp of course), it will provision properly and become managed.  So problem 1: fails to start VM on ovirt computer resource. Problem 2, possibly related if it's not saving something until the power on completes, kickstart file not available until after initial provisioning fails.

Hi,

I have seen the same issue on 1.5 RC1, have you been able to solve this ?

#### **#2 - 04/23/2014 07:57 AM - Ohad Levy**

which version of ovirt are you using?

#### **#3 - 04/23/2014 08:01 AM - Yama Kasi**

I'm on oVirt 3.4.

#### **#4 - 04/24/2014 10:34 PM - Yama Kasi**

Hi Guys.

This just seems to "work" again as it did before on this same install.

I didn't change a thing here.... so I will report when it's happening again...

No clue yet!

Finally got a chance to test and can confirm that this has been fixed for me in nightlies. Thanks!
