

Foreman - Bug #5141

User unable to access children taxonomies

04/10/2014 12:13 PM - Daniel Lobato Garcia

Status: Closed	
Priority: High	
Assignee: Joseph Magen	
Category: Organizations and Locations	
Target version: 1.5.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
When a user has a taxonomy "a" with children "a/b" and "a/c", I think it's expected that if the user owns the top-level taxonomy, that user has also access to stuff in the subtree ("a/b", "a/c" in the example).	
It doesn't seem to be the case and only the root taxonomy is visible in the top bar, I cannot change the location/organization to anything but "a".
