Pull request:	

Description

(In reply to Sachin Ghai from comment #0)

Created attachment 877122 [details]
cv status still shows 'promoting...' though the product is already promoted

Description of problem:

Created a content-view, and published it. After publishing, I promoted it to next env. The status doesn't update.. issues are:

1. The status column shows a link "Promoting to 1 environment", and if I click that link, the other page 'Promotion History' shows success.

2. if you navigate away from this 'versions' tab of content-view, the status shows nothing, that block looks empty..

Version-Release number of selected component (if applicable):
snap4

How reproducible:
always

Steps to Reproduce:

1. create product/repo and sync it
2. create a env under library, say 'test'
3. create a CV
4. publish it

5. promote the CV to test env
6. check the status as mentioned in description

Actual results:

status of CV promotion doesn't reflected/updated properly

Expected results:

status should be reflected properly after successful promotion like:

Promoted to 'test' environment instead of 'Promoting to 1 env'

also, if we navigate away from versions tab, still status should be reflected properly
