Pull request:	
Description	
<p>I am getting an error when I create a taxonomy and select the "All Users" checkbox for assignment. I can create, edit, and destroy locations and organizations with any variety of settings set, as soon as the "All Users" box is checked this error is presented when I try to edit the taxonomy. Manually editing the MySQL foreman.taxonomies table and removing User from the ignored_types YAML list lets me go in and work without encountering this bug. The issue looks to be that a query is constructed that references usergroups.admin in the WHERE clause but is only selecting data from the users table.</p> <p>I am running Foreman and Foreman Proxy on the same host as Puppetmaster. It is RHEL 6.5 x86_64 with the Puppetlabs repo, epel, and remaining packages are installed from RHN.</p> <p>I am running the Git branch develop (1.5).</p> <p>I just did a git pull and I believe everything is in working order and fully updated.</p> <p>I am using MySQL (mysql-server-5.1.73-3.el6_5.x86_64) as a backing database, on another host, it was previously migrated from local PostgreSQL if that matters.</p> <p>The full stack trace is included below with full stack trace. I can provide logs if needed.</p> <p>Warning!</p> <pre>Mysql2::Error: Unknown column 'usergroups.admin' in 'where clause': SELECT `users`.`id` FROM `users` WHERE ((users.admin = 0 OR users.admin IS NULL) AND (usergroups.admin = 0 OR usergroups.admin IS NULL)) If you feel this is an error with Foreman itself, please open a new issue with Foreman ticketing system, You would probably need to attach the Full trace and relevant log entries.</pre> <pre>ActiveRecord::StatementInvalid Mysql2::Error: Unknown column 'usergroups.admin' in 'where clause': SELECT `users`.`id` FROM `users` WHERE ((users.admin = 0 OR users.admin IS NULL) AND (usergroups.admin = 0 OR usergroups.admin IS NULL)) app/models/taxonomy.rb:113:in `user_ids' app/helpers/layout_helper.rb:92:in `multiple_selects' app/helpers/layout_helper.rb:157:in `field' app/helpers/layout_helper.rb:156:in `field' app/helpers/layout_helper.rb:149:in `field' app/helpers/layout_helper.rb:148:in `field' app/helpers/layout_helper.rb:85:in `multiple_selects' app/views/taxonomies/_form.html.erb:30:in `_app_views_taxonomies__form_html_erb__1159601028_70111468228240' app/helpers/layout_helper.rb:246:in `form_for' app/views/taxonomies/_form.html.erb:2:in `_app_views_taxonomies__form_html_erb__1159601028_70111468228240' app/views/taxonomies/edit.html.erb:4:in `_app_views_taxonomies_edit_html_erb__1370968054_70111467727960' app/controllers/concerns/foreman/controller/taxonomies_controller.rb:66:in `edit' app/models/taxonomy.rb:40:in `no_taxonomy_scope' app/models/taxonomy.rb:47:in `as_taxonomy' app/models/concerns/foreman/thread_session.rb:143:in `as_location' app/models/taxonomy.rb:46:in `as_taxonomy' app/models/concerns/foreman/thread_session.rb:108:in `as_org' app/models/taxonomy.rb:45:in `as_taxonomy' app/models/taxonomy.rb:39:in `no_taxonomy_scope' app/controllers/concerns/foreman/controller/taxonomies_controller.rb:64:in `edit' app/models/concerns/foreman/thread_session.rb:33:in `clear_thread'</pre>	

History

#1 - 04/11/2014 06:36 AM - Jared Ballou

Apparently I don't know how to use Git... wasn't checking out the develop branch properly, tried applying the fix from [#4995](#) and saw my files were actually out of wack. Did a new pull, bundle install and db:migrate and the issue is resolved. Sorry for the false alarm!

#2 - 04/11/2014 08:36 AM - Lukas Zapletal

- *Status changed from New to Rejected*

Okay, happens all the time to me. Thanks!
