

Katello - Bug #5161

Default Content View should not be selectable if it cannot be added to a composite

04/11/2014 06:15 PM - Walden Raines

Status:	Closed	
Priority:	Normal	
Assignee:	Walden Raines	
Category:	Web UI	
Target version:	Katello 2.0	
Difficulty:		Fixed in Releases:

Bugzilla link:	1082712	Red Hat JIRA:
Pull request:		

Description

(In reply to Corey Welton from comment #0)

Description of problem:

By design, the default content view cannot be added to a composite. However, it appears in the list when choosing views to be added to a composite.

If we cannot add it, it seems needlessly error-prone to make it appear like it can be selected. We should hide it or gray out the checkbox, perhaps with a tooltip noting that the default view cannot be added to any composites.

Version-Release number of selected component (if applicable):

How reproducible:

Steps to Reproduce:

1. Create some content views
2. Attempt to create a composite content view; from the available content view options, select the default view alongside any others you might want to include.
3. View resulting error mesg.

Actual results:

User is told that default view cannot be added to any composites.

Expected results:

Disable selection of, and/or hide this view if it cannot be added.

#5 - 05/01/2014 01:09 AM - Mike McCune

- Status changed from Closed to Assigned

This appears to be still occurring in a more subtle way, the Default is no longer shown but it appears to be select-able:

- 1) go to the Content Views tab of a Composite View
- 2) Ensure you have multiple views available
- 3) Hit the Select All checkbox to select all views
- 4) Hit "Add"
- 5) note error:

"An error occurred updating the Content View: Cannot add default content view to composite content view "
