

Foreman - Bug #5170

Global parameters can only be strings

04/11/2014 11:46 PM - Anonymous

Status: Duplicate	
Priority: Normal	
Assignee:	
Category:	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases: 1.4.2
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description When I try to save a global parameter which has a boolean value, it is saved as 'true' or 'false'. This is inconsistent with the class parameters which can be set to a variety of different types.
