

## Foreman - Feature #5174

### Possibility to run puppet agent with --tags from foreman UI

<b>Pull request:</b>	
<b>Description</b> It would be great if it was possible to trigger a puppet run with support for tags.  If you could select from a list of available tags for the host you are going to run puppet on, and run puppet agent only for selected tags, because it is not always wanted to run a full puppet run with all classes applied.
