<b>Pull request:</b>	
<b>Description</b> If you click select all on a composite's content view add page the total will include content views that were filtered out of the list.	
<b>Steps to Reproduce</b> <ol style="list-style-type: none"><li>1. Create two content views</li><li>2. Publish one</li><li>3. Create a composite content view</li><li>4. Go to the composite's content view add page</li><li>5. Click select all</li><li>6. Notice the count reflects the non-published content view</li></ol>

##### Revision 01b4d38a - 07/01/2014 12:25 PM - Walden Raines

Fixes #5181/BZ1110955 - filter available for composite CV server side.

The bugs mention that the total is incorrect when using the select all control. This was due to Bastion transforming the response from the index call on Content Views and hiding non-applicable results. This commit moves that logic to the server side where it belongs.
