Pull request:		
Description		
The UI needs to provide cross-linking that will allow a user to easily navigate from a Katello Content Host to it's corresponding Foreman Host.		

Associated revisions

Revision 4a616cfd - 05/02/2014 09:55 AM - Brad Buckingham

Fixes #5186, #5189 - Content Host - show provisioning details and cross-link to Foreman host

This commit contains a few basic changes, including:

1. Add a foreign key to katello's system to enable associating it to a foreman host
2. Add a 'Provisioning Details' tab to a katello content host
3. Add high-level information from foreman to the provisioning details. At this time, this includes the information that is currently shown from foreman host list, such as name, status, OS, puppet environment, last puppet report, model & host group.
4. Provide cross-linking (where possible) from the katello content host to the foreman host. This currently supports linking to the host as well as hostgroup.

Revision 4e66371f - 05/02/2014 11:29 AM - Brad Buckingham

Merge pull request #4015 from bbuckingham/issue-5189

Fixes #5186, #5189 - Content Host - show provisioning details and cross-link to foreman host
