Foreman - Feature #5195

wget registration errors should be logged into "install.post.log"

Description

Currently, a wget problem during machine registration after kickstart might not get logged.

For instance I booted up a box with a Dynamic DNS duplication and the wget called recieved a 409 error, but that didn't get logged into "install.post.log". The log file showed

```
    Complete!
    Configuring puppet
    Informing Foreman that we are built
```
