Katello - Bug #5233

System Groups: Systems pane: clicking system names doesn't work properly

04/17/2014 04:25 PM - Brad Buckingham

Status:	Closed		
Priority:	Normal		
Assignee:	Brad Buckingham		
Category:	Web UI		
Target version:	Katello 2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**

Pull request:			

Description

When the user clicks a system name from the Systems pane for a System Group, they are not correctly redirected to the systems page.

Scenario:
1. go to Hosts -> System Groups
2. select a system group
3. select the Systems pane (or Content Hosts, if that is what is is now labelled as)
4. click one of the items under the Name column

NOTE: the same behavior will occur from both the Remove/List and Add panes; therefore, this issue should address fixing both.

5. observe that it attempts to redirect to the Systems page; however, it isn't able to load the selected system. Observe an error similar to the following in the rails log:

Processing by Katello::Api::V2::SystemsController#show as JSON
Parameters: {"fields"=>"full", "api_version"=>"v2", "id"=>"4"}
Setting locale: en
Checking params for katello/api/v2/systems/show
Katello::System Load (0.3ms) SELECT "katello_systems".* FROM "katello_systems" WHERE "katello_systems"."uuid" = '4' LIMIT 1
Katello::Errors::UserNotSet: unauthenticated to call a backend engine

Completed 403 Forbidden in 6.0ms (Views: 0.3ms | ActiveRecord: 0.3ms)
With body: {"displayMessage":"unauthenticated to call a backend engine","errors":["unauthenticated to call a backend engine"]}
