

Foreman - Feature #5240

Expose eager-zeroing for vSphere volumes

04/18/2014 04:08 AM - Dominic Cleal

Pull request:	https://github.com/theforeman/foreman/pull/1708	

Description

From <https://github.com/theforeman/foreman/issues/1382>

I quickly hacked app/views/compute_resources_vms/form/vmware/_volume.html.erb so the last lines are:

```
<%= checkbox_f f, :thin, {
  :label => _("Thin provision"),
  :class => 'disable-unsupported'},
  "true",
  "false" %>
<%= checkbox_f f, :eager_zero, {
  :label => "Eager zero",
  :class => 'disable-unsupported',
  :help_inline => remove_child_link("X", f, { :method => :'_delete', :title => _('remove volume') }, :class => 'label label-danger disable-unsupported' )},
  "true",
  "false" %>
</div>
```

Hacked because I didn't bother with the label localization.

It doesn't work out of the box yet because of a bug in fog (<https://github.com/fog/fog/issues/2857>) but at least with both fixes my SAN admin is happy now :)

Sorry for not supplying a PR. Hope it's trivial enough for someone to do (properly).
