

Foreman - Bug #5246

Puppet classes on config groups aren't added to host's ENC YAML output

04/19/2014 07:58 PM - Dominic Cleal

Pull request:		
Description Add a config group with a Puppet class assigned, then assign the config group to a host. Provided the parameterised ENC is enabled, view the ENC YAML output from the host page and the new classes won't be listed. It appears that the Classification::ClassParam / Base implementations have their own way of getting the puppetclass_ids for a host and its host group, without checking for config groups too.
