		Red Hat JIRA:
Description		
When I go to change boot device or start/stop/poweroff a machine through BMC, I get		
The page you were looking for doesn't exist.		
You may have mistyped the address or the page may have moved.		
An example URL is https://10.10.11.2/hosts/my.cool.host.com/bmc?ipmi_device=pxe		
Think this is a regression in IPMI/BMC integration as this was working fine in earlier 1.3/1.4 releases

Is duplicate of Foreman - Bug #5205: Build PXE default button has broken link		Closed 04/15/2014

History

#1 - 04/22/2014 09:22 AM - Dominic Cleal

- Category set to BMC
- translation missing: en.field_release set to 4

#2 - 04/24/2014 12:23 PM - Dominic Cleal

- Target version set to 1.8.3

#3 - 05/06/2014 04:20 PM - Dominic Cleal

- Is duplicate of Bug #5205: Build PXE default button has broken link added

#4 - 05/06/2014 04:20 PM - Dominic Cleal

- Status changed from New to Duplicate
- Target version deleted (1.8.3)
- translation missing: en.field_release deleted (4)

Thanks for the report, it seems we've fixed this via [#5205](#) (it affected links across the application). This should be in 1.5.0-RC2 and higher.
